

Title:

dCache administration workshop with hands-on parts

Author:

C. Mitterer, X. Mol, O. Tsigenov, German storage support group

Abstract:

dCache is a storage for amounts of data which are distributed among a large number of heterogenous server nodes.

The workshop has the following structure:

- Introduction to dCache and the tools used for accessing data stored in a dCache instance
- Installing dCache on a virtual machine
- Security and authorization
- Space management (SRM)
- Administration and trouble shooting
