

Title:

gLite Administration Workshop

Author:

Angela Poschlad, KIT

Abstract:

This course deals with the handling of gLite site services. The students will learn in lectures and discussions how to deal with gLite updates, problems, monitoring and challenges of larger sites. The course offers a number of different services to install and manage such as the (CREAM) CE, Workload Management System (WMS), site BDII, nagios for monitoring and many more..
